

Colour Range

Please note the colour chips in this brochure have been screen printed. Other Series and applications will give differing final shades.

Although the shades in the various series are similar, they are not an exact match. Before formulating any fluorescent product, reference should be made to our technical information with regard to the effects of solvents, plasticisers and heat on the various series.

We recommend that the prospective user determines the suitability of our materials before adopting them on a commercial scale.

Los chips de colores de este folleto han sido impresos por serigrafía, otras series y aplicaciones darán tonalidades finales diferentes.

Aunque la gama de tonos de las distintas series son muy similares, no coinciden con exactitud.

Antes de efectuar la formulación de cualquier producto fluorescente aconsejamos observar nuestra información técnica, en especial en lo que se refiere al empleo de disolventes plastificantes y temperaturas relativas a las distintas series. Recomendamos que los futuros usuarios determinen la conveniencia de nuestros materiales y sugerencias antes de adaptarlos a escala comercial.

请注意:

本色卡上各种荧光颜色都是用丝印印制, 只作一般参考指标之用。在施特灵的产品系列中, 虽然每种色相都很相似, 但在不同系列和实际用途上都有很细微的差别。使用者应在实际生产前, 全面测试产品的特性。

The Sterling Colour guarantee is limited to the consistent quality of its products. Technical information, advice, verbal and written suggestions and test results are offered for guidance without responsibility. No warranty of merchantability for a particular purpose is made. Users are responsible for testing our products and suggestions to ensure that they are suitable for the intended purpose and application prior to use.
